

New for the Apple II from QUALITY COMPUTERS

Does your child know how to react in an emergency?

As a parent or teacher you try to equip your child to handle whatever life throws at them. There's so much out there that can hurt them. That's why children, even young children, should know basic first-aid.

First-Aid with Reddy is the only computer program that teaches basic first-aid techniques to children as young as first grade. Your child will be captivated by the colorful animation and cheery sound as Reddy demonstrates proper techniques of treating burns, poison, shock, broken bones, bites, bleeding, and more.

The lessons are simple, and easy enough for a child to practice and use with confidence. Your child will learn how to determine treatment, how to keep a victim calm, how and where to get help, how to dial 9-1-1, as well as treatments for specific injuries.

Give your children the tools to act in an emergency — with confidence. Get *First-Aid with Reddy*.

Make your IIGs anything you want it to be

Is your IIGS just plain vanilla? Now you can make it a custom ride — with *Signature GS*. Q Lab's set of C-Devs that will soup up your Apple IIGS. *Signature GS* lets you create a computing environment that is uniquely your own. With *Signature GS* you get:

PHANTASM — A utility that prolongs screen life — and looks good doing it. When your screen has been still too long, it can become damaged. *Phantasm* prevents damage by automatically giving your screen something to do. A variety of fun, attractive screen activities are available, plus you can tell *Phantasm* when to come on.

GRAFFITI — There's nothing wrong with the IIGS desktop — except it's boring. *Graffiti* gives you a variety of colorful desktop patterns to choose from — or you can create your own.

SONICS — The "S" in IIGS stands for sound. *Sonics* lets you customize your IIGS sounds, and assign special sounds for specific functions. And these aren't just beeps — they're fun and entertaining. Add sounds to Insert/Eject Disk, Dialog Boxes, etc.

BOOTMASTER — Changing the configuration of all your IIGS's drivers, and system elements can be a pain. But *BOOTMASTER* makes it easy by putting the controls for all your IIGS's drivers, CDAs and NDAs on one master control panel. You turn them on and off at will — and change your selections easily.
