# Apple III SOS Designers and Programmers

# Apple /// SOS Designers and Programmers

DAVID T. CRAIG  
1989

**This document attempts to describe the people behind the software design and programming of the Apple /// computer operating system, SOS. Accuracy is not guaranteed since the author of this document is in no way associated with Apple Computer. All names originated in either Apple Computer publications or within the SOS source code. No information is provided on people behind the hardware aspects of the Apple /// since this is documented fairly well in several books about Apple Computer.**

## **Bruce Daniels**

First project leader and system architect, co-designer of SOS. After the /// worked as Software Manager for the Apple Lisa computer. Lives in Bakersfield, California as of 1988.

## **J. R. "Dick" Huston**

Designer of SOS file system. Went on to work on SOS's successor ProDOS for the Apple // and assisted with firmware writing for the Apple //e and //c computers.

## **Stephen Smith**

Wrote mouse driver for the Apple /// (ref: source file SysGlob.Text).

## **Rick R. Auricchio**

Wrote parts of SOS. Went on to write parts of firmware for Apple //e and //c computers.

---

Many others most likely were involved with SOS. Their names appear on the Acknowledgements page of the **SOS Reference Manual**. These people are:

Bob Etheredge, Tom Root, Bob Martin, Dick Huston, Steve Smith, Dirk van Nouhuys, Ralph Bean, Jeff Aronoff, Bryan Stearns, Russ Daniels, Lynn Marsh, and Dorothy Pearson
