**Let FileWriter write all
your information programs for you.
Why pay for separate programs for home budgets, tax records,
credit cards, etc. — when you can CREATE THEM ALL YOURSELF.
There's no programming to learn. It's easy — the first time you try:**

A.

Simply "draw" your screen any way you'd like it to look — just like a piece of paper. Enter words, numbers, dates — whatever you need.

B.

If you need AUTOMATIC CALCULATIONS, it's easy. Just use the screen you designed to describe what you need. For example: new balance = bal last mo + purchased this month + interest this month — payment this month. Be as simple or as complex as you'd like!

C.

Add any 'help messages' you want — in YOUR OWN WORDS. For example: "Don't skip this entry" or "Use numbers here."

D.

When you're finished, FileWriter writes all the "computer code" for you! In minutes you have a BRAND NEW PROGRAM on your own disk. You may enter, search, change, cancel, and update any information you like — at computer speed! There is no limit to the number of programs you can create.

```
1 rem *program name is Credit/t*
2 rem *data file name is Credit/d*
4 rem *number of records is 200 *
10 clr:gosub52210:gosub 33000
37 dim f$(nf),dt%(nf),ss%(nf+nc)
55 tt$="Finished with data entry?(Y/N)"
60 open4,8,4,"0:Credit/d,1,"+chr$(80)
100 printtab(20−(9+ 11 /2));"Program
Design by John Harper"
110 printtab(20−(16/2));"Credit Card"
```

Harper Family Credit Cards

Co Name...Master Charge Yr......1983
Acct # 5420 1799 3443 2338.
Bal last mo........327.58 Curr Mo.. Aug

Purchased this month........121.32
Interest this month.............5.36
Payment this month.........250.00
NEW BALANCE..............204.26

Purchases this year.........3244.32
