EGGS-IT

As the only protector of Earth's inhabitants, you must stretch your endurance to the outermost limit! You alone can destroy the bizarre life forms emerging from an alien asteroid and threatening our planet. This strange, metallic invader from the galaxy Zarcob appeared suddenly and mysteriously began its close, dangerous orbit around the earth.

"Tolgers" from the asteroid are advancing rapidly. Each one that escapes your projectiles will eggs-it up the conveyors to the incubators, where hatching releases any one of eight creatures. These creatures must be destroyed! As they mature they gain strength and point value. When they reach their adult stage, the Vulchan Flyer appears. He or the creature (or both) must be destroyed before he snatches the creature and transports it to Earth for the ultimate destruction!
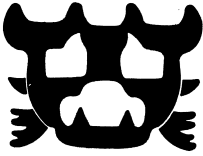

Beware when you reach the cheating level!
