

## **Federal Communications Commission Radio Frequency Interference Statement**

The equipment described in this manual generates and uses radio frequency energy. If it is not installed and used properly, that is, in strict accordance with these instructions, it may cause interference to radio or television reception.

### **FCC I.D. Number: EYW5QGRAMFACTOR**

This equipment has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of the FCC Rules. These rules are designed to provide reasonable protection against radio and television interference in residential installation.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reposition the receiver's antenna. Also make sure the antenna wires are making good electrical contact.
- ☐ Use a roof-mounted antenna rather than a "rabbit-ear" antenna or an antenna mounted in the attic.
- ☐ Make sure that all electrical connections on the computer are secure and any shielded I/O cables are properly fastened.
- ☐ Move the computer away from the receiver.
- ☐ Plug the computer and receiver into separate electrical circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful:

#### **"How to Identify and Solve Radio-TV Interference Problems"**

This booklet is available from the U.S. Government Printing Office, Washington, D.C. 240402, Stock No. 004-000-00345-4.

**Warning:** This equipment has been certified to comply with the limits for Class B computing device, pursuant to Subpart J of Part 15 of FCC Rules. Only peripherals (computer input/output devices, terminals, printers, etc.) certified to comply with the Class B limits may be attached to this computer. Operation with non-certified peripherals is likely to result in interference to radio and TV reception.

Applied Engineering is not responsible for any radio or television interference caused by unauthorized modifications to this equipment. It is the responsibility of the user to correct such interference.
