

System II Apple II

Graphical Desktop for the Apple II

System II is the Desktop program for the Apple II. You will find it useful for running applications from a desktop, viewing the contents of files, and making things simpler in a lab or kids office.

Contents: System II is a ProDOS 8 application. It comes in two ShrinkIt archives. The first is the program and the second is an AppleWorks file with documentation. If you have questions, you can e-mail: eric@kitchen-sink.com and he will answer as many questions as he can.

Instructions: The manual has been converted to AppleWorks word processor format. Once the archive is expanded, run II.SYSTEM and it will repair the directory attributes that ShrinkIt does not maintain.
