## INFORMATION

This is the Newsletter of Mini'app'les, the Minnesota Apple Computer Users' Group, Inc., a non-profit club. Articles may be reproduced in other User Groups' publications except where specifically copyrighted by author.

## Questions

Please direct questions to appropriate board member or any officer. Technical questions should be directed to one of the Technical Advisers listed here.

## Membership

Applications for membership should be directed to the Membership Co-ordinator. \$12 buys membership for one year. Members receive a subscription to this newsletter and all club benefits.

## DOMs

The 3 most recent DOMs (Disk of the Month) are available at meetings for \$5/disk or any DOM may be ordered by mail for \$7.50/disk. Contact Software Sales coord'r.

## Dealers

Mini'app'les does not endorse any specific dealers but does promote distribution of information which may help club members to identify the best buys and service. Consequently the club does participate in bulk purchases of media, software, hardware and publications on behalf of its' members.

## Newsletter

### Contributions

Please send contributions directly to the Newsletter Editor. Hard copy binary or text files are preferred, but any form will be gratefully accepted. Deadline for publication is the 3rd Wednesday of the month preceding the month in which the item might be included. An article will be printed when space permits if, in the opinion of the Newsletter Editor, it constitutes suitable material for publication.

## DOM #13

by Al Peterman

As the new program editor, I would like to thank Ken Slingsby for the excellent work he has done in setting up the format for the disk of month and it's documentation. His work will make mine much easier.

To assemble the programs for the DOM, in a manner that will provide the best final product, I will need input from the members of this club in both selection of the kind of material to be 'published' and contributions of the program themselves. I especially would like suggestions on what kind of materials to put on the disks. Please feel free to contact me about the types of software you want to see. Also, it is very important that if you have developed any programs that you are not going to copyright, that you submit them to me for possible use in the DOM. This will give me the greatest selection and allow me to choose better software for the DOM's. I have a large amount of old material that I may have to use if the new material isn't enough to fill the DOM's as they are produced.

Since I got the materials for DOM #13 (nice lucky number to start on!) at the May meeting, and as there was no way to get the documentation for this DOM to Dan in time for the June newsletter, it is appearing a little late. The DOM features a DOS modifier to create custom commands such as 'FILL' instead of 'LOAD'. There is also a lovely system to create screens of text using a binary load of the screen page of memory, a technique that can save lots of memory space. For those of you who use Applewriter, there is a conversion program from Applewriter to or from standard text files. And finally for those of you who might dare to use your Apple in a non-serious mode for gaming, there are some new MADLIBS, and an AWARI game among the other programs on this DOM.

### LOGO

Logo for DOM - Created by Tim Pfaff using a Versawriter.

### DOS MODIFIER II

A program to create your own custom DOS. This will allow you to tailor DOS error messages and commands to your own words. It is much like 'Doss Boss' with a few extra twists thrown in. From the IAC.

### REMINDER GENERATOR

A program to create REM statements into a text file that can be 'EXEC(ed)' into your program with ease. From the IAC.

### DISK ZAP

A general purpose disk access utility to examine and modify information on a diskette sector by sector. From our 'old library' and the IAC.

### ROWTSE

An Applesoft diskette examiner-/modifier. It allows sector by sector examination with modification and printout capability. From the IAC.

### PERPETUAL CALENDAR

This program will produce calendars for those of you who might need one for the year 2004! Another fine product from the International Apple Corps.

### TXFILER

A machine code program that will allow the conversion of standard ASCII DOS text files to Applewriter format and vice versa. Very useful for the many of us who use Applewriter!! Requires software contained on the Applewriter program disk. From the IAC.

### TXFILER INFO

An information program that will explain the uses and capabilities of 'TXFILER'. From the IAC.

### INVERSE FIELD INPUT

Using INVERSE fields, this utility demonstrates a method to prompt on the screen the limits of a response expected from the user. From the IAC.

### SCREEN WRITE INSTRUCTIONS

Instructions for the SCREENWRITER System. From the IAC!

### SCREEN WRITE 2.1

Binary screen machine language driver.

### SCREEN EDIT

The screen edit/create program for the 'SCREENWRITER' system. This program allows you to save/restore to/from disk copies of the TEXT page on your screen. With the editor, cursor control is provided to modify the screen at any point, inserting lines in NORMAL, INVERSE or FLASH mode. From the IAC.

GOTO 4

## VEEP'S VIEWS

by Chase Allen

As I write this, the first meeting under the new format is history, and I was encouraged in that everyone seemed to be participating in one discussion or another. We will continue the effort for another month at least, unless I get a lot of unfavorable feedback in the meantime.

Special thanks go to Bill Irish, who gave an excellent presentation on his work with the St. Paul Water Utility. I think there is a fellow who has great capability, and who is enjoying his work immensely.

The meeting for July will feature another remarkable effort by Dr. John Tilleli, who is the director of the intensive care unit at Children's Hospital in St. Paul. John has a PhD in Physics, and spent several years in Electronics developing digital systems

for NASA. He tired of that and went back to Medical School, where he received his Doctor of Medicine, and is now melding his two careers, developing a Patient Monitoring System which will be the subject of his paper. The system is based around the Apple I, and uses a Corvus Disk for mass memory. I think this will be a very good program you will not want to miss.

Please keep the communication lines open. If you have any suggestions for program subjects, I am looking for ideas to pursue. Also, I am most interested in feedback on our meeting format, subjects you feel need covering with Cluster groups, and others that need treatment by a specially scheduled seminar. This is your club for your benefit, and we want to serve your needs. Let's hear from you.

### DOM

DOM #13 Continued from page 3

#### LIFE EXEC

An 'EXEC' file to set the HIMEM and the LOMEM values for the life program. This is a good example of using an 'EXEC' file to set parameters and run a program. To use it type 'EXEC LIFE EXEC'. From the IAC.

#### LIFE

(LOMEM 3072:HIMEM 8172)

The game (or should I say science) of LIFE in which dots propagate and die according to very set rules. This has produced many interesting studies on the topology of such sets of figures. 'Generations' are displayed on a LORES screen. From the IAC and various other sources.

#### MADLIB

This will liven up your next party with a new set of very funny 'Madlibs' (or fill in the blanks with blind stories). They are new and have a nice routine to print on the screen in black and white. From the IAC.

#### AWARI

This cute little game is based on a not so obvious strategy. The game revolves around moving 'stones', shown on a LORES screen, from bin to bin. You compete with the computer. It is suitable for children as well as adults and is a good game to show elementary preplanning. From the IAC and the 'old library'.

#### DECISION

An excellent decision making program. It will evaluate many options or products with many factors and weigh the factors according to importance. It can save data to disk or tape and allows one quite easily to make changes in the factor, items, importance or grading. From the IAC.

#### COMPUTERS. DECSN

An example of a binary file of data for the 'DECISION' program. This example shows how to choose a personal computer.

#### ARITHMETIC TAC DOUGH

This children's game can help teach the four basic arithmetic operations in a fun game of Tic-Tac-Dough. Two persons play on a LORES Tic-Tac-Toe board which displays the results of your arithmetic skills. From the IAC.

#### HERB'S CALCULATOR

This program will turn your \$2000 apple into a \$25 full function calculator. It has square root and exponential functions and even looks like a calculator! From the IAC.

#### STATE CAPITALS

If you need a little help with your U.S. geography this program will help you remember the capitol of West Virginia (or any other state). Uses a LORES color map of the USA. From the IAC.

# EPSON NEWS

## GRAFTRAX PLUS

*by Dan Buchler*

In last month's column, I mentioned the new Graftrax Plus. All MX-80s and 100s will from now on have the Graftrax Plus.

A new manual comes with the printers. Written again by David Lien, he persists with his horrible chaty-chat and bad jokes which I and others think distract from what should be a manual and not a comic book! Other than that complaint, the manual is less TRS-80 oriented than before and does seem to be complete.

Contrary to the beleif of some of our members, there is no built in screen dump. Epson does furnish a disk, which has the same dump program most of you have already seen.

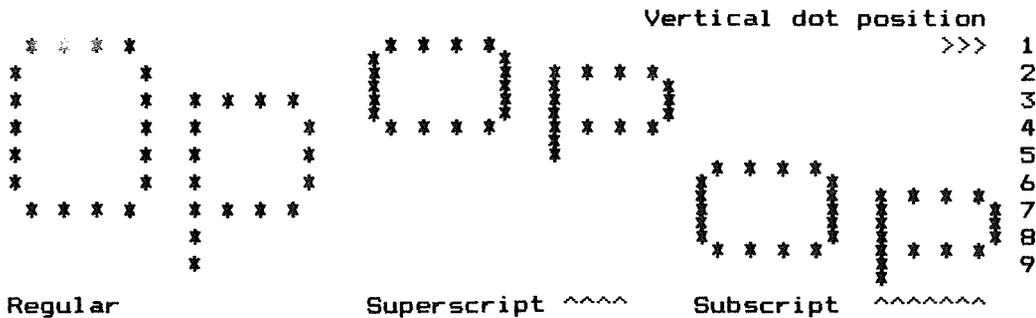

We now have had a chance to analyze the technical content of the manual and here is what we found.

(The parenthesis at end of each paragraph shows the control codes for the mode just described)

1. The features of the MX-80 and MX-100 are now identical except for the longer line capability on the MX-100.
2. A sub- super-script (SS) character set has been added. The SS characters are created from the same 9\*9 dot matrix as for the regular charater set, except that the dots in the vertical direction are printed at 1/2 dot intervals instead of one dot intervals. The superscript occupies the upper 4.5 dot positions in a row; the subscripts the lower 4.5 dot positions as shown below for the word "Op": (Each \* represents a dot).

Note that as with all Epson characters, 1/2 dot spacing is used in the horizontal direction (Thats how they get 9 dots of precision in 4.5 dot space for the condensed mode) Since the print wires are at one dot spacing, the SS characters are printed in 2 passes using doublestrike. That's why the bottom dot of the descender on the p in the subscript is 1/2 dot below the bottom dot of the regular p. The SS characters can be printed in regular or compressed mode. (Esc S N; N = 0 for superscript; N > 0 for subscript)

3. An underline mode in which the underline is printed at the same time the remainder of the character is printed. (Esc - N; N>0, underline on; N=0, underline off)
4. Italics for MX-100; same as before for MX-80. (Esc 4, On; Esc 5, Off)
5. 1/3rd dot line spacing for MX-100; same as before for MX-80 (Esc 3 N). Also 1/3rd dot line spacing for one line only. New for MX-80 and 100. Useful for special once only effects. (Esc J N)
6. Home printhead for MX-100; allows one line unidirectional print. Same as before for MX-80. (Esc <)
7. Set form length in inches instead of lines for MX-80. Same as before for MX-100. Very useful when changing vertical spacing in middle of page! (Esc C N)
8. Set for skip-over-perforation at bottom of page for MX-80. Same as before for MX-100. (Esc N N, on; Esc O, off)
9. Set column width. New for MX-80; same as before for MX-100. (Esc Q N)
10. Multiline unidirectional printing. New for MX-80 and 100. Great for

## RECYCLED MUSIC SYSTEMS FEATURE PRODUCTS

There have been some significant new products and some good price reductions in the last 2 months so I am putting down some of them as examples. If you are interested in other products please call!

### PRINTERS:

EPSON MX-80FT/III with GRAFTRAX+ (Superscript etc.) \$580  
 PRINTER COMPANION letterhead carrier for MX-80 \$ 10

### DISPLAYS:

BMC 12A high resolution (15 mhz) monitor \$105  
 AMDEK 300 18 Mhz monitor with non-glare screen \$165  
 DAN PAYMER LCA-2 lower case chip with software \$ 27

### MEMORY:

TRAK Disk Drive, Totally compatible with cable & plug \$325  
 CONSUMER COMPUTER 16K RAM card for Pascal or Integer \$ 85  
 SATURN 64K Ram Card with disk emulator & DOS mover \$340

These prices are only for Mini'app'les members, and require proof of membership (membership card or equivalent).

We handle products from MicroSoft, Hayes, Amdek, Mountain Computer, Dan Paymer, Epson, Vista, Olivetti and others. Most items are IN STOCK!

For more information call Alan at:  
 (612)-721-3295

Quality consumer electronics for over 12 years!!

### Epson News Continued from page 6

condensed mode to eliminate ragged line edges! (Esc U N; N>0, On; N=0, Off)

11. Double width printing on all the time. New for MX-80 and 100. Now you can LIST in double width. (Esc W N; N>0, on; N=0, off)
12. Line graphics for the MX-80 and 100. Instead of the MX-80 block-graphics (TRS-80 owners lament!), there area set of 11 'line' graphic codes which contain horizontal and vertical line segments, corners and intersections. ASCII codes 134, 1nd 149 thru 159 (less 155 the Esc) are used.

### FEATURES ELIMINATED

The following features have been eliminated:

- a. Block graphics on MX-80 The ASCII codes previously used for the Block graphics are now used for the Italic character set. However Italics may be selected with the old Esc 4 sequence (which probably just sets the high order bit, inside the Epson).
- b. Some of the foreign language

characters available in the MX-100 through software and the MX-80 through switches. 5 new special symbols are included via ASCII codes 129 through 133. The Japanese MX-80 Katakana is no longer included.

- c. The MX-80 high-speed double density graphics which was previously of dubious use has been eliminated.

### SUMMARY

The new Graftrax Plus sounds pretty good. There are some nice additional features. The most useful to me are the set forms length in inches and the superscripts. If you do alot of underlining, the enhanced underline feature is much faster than the old backspace/underscore method which homed the printhead.

For MX-100 owners, the 1/3rd dot spacing feature improves the Graphics capability.

Currently Epson offers no trade-in on your old Graftrax chips. However some pressure has been applied to their marketing dept. to perhaps persuade them to change their minds!

## APPLEFEST/BOSTON

by S.K. Johnson

A Quick Look At Something To Look Forward To In Minneapolis In Sept

I was thrilled to have an opportunity to spend only four hours on Friday May 14 at the Applefest in Boston. Mind you, four hours was not enough time to spend with all the Apple related equipment, hardware and software for your eyes to behold, but that was all the time my schedule would allow.

This was the second year for the Applefest in Boston. This year was alot bigger than last. There were fourteen aisles with over 200 exhibitors, and seminars were held hourly.

I had a chance to meet Val Golding, editor of Call-A.P.P.L.E., and Ken Silverman, President of the IAC. It was interesting to meet these people after reading articles they had written. Neither fit my preconceived picture of what they should look like. Both were very much like you and I, Apple owners.

Apple Computer had a booth showing off some of their new software. They did not have any new hardware to show nor would they tell me anything about what new products are coming.

While there, I was able to meet representatives from some of the New England area computer clubs and set up some newsletter exchanges. The major magazines (NIBBLE, MICRO, etc.) were there with examples of their publications and people to answer questions. Softalk publishing Inc. was there with copies of their new Softline magazine and Softdisk magazine.

Several companies had new software and games to show off. It would of taken all three days of the Applefest just to try all the demos.

If the Applefest scheduled for September 16-19 in Minneapolis is anything like the one in Boston was, you will probably want to reserve more than one day to see it all. I, for one, am looking forward to the upcoming Applefest with great expectations. See you there.

## TOUR

### CUSTOM BUSINESS FORMS

by Dan Buchler

Right here in the Twin Cities is an interesting resource for users of Personal computers who might need customized forms. Custom Business Forms of Minneapolis is the largest manufacturer of computer forms in the area and appears to be a very innovative operation. House of Forms is a subsidiary of Custom Business Forms.

Frank Miske, the company manager, was kind enough to take us on a quick tour. We were really suprised at the multi floor operation in that old, but very strongly built, warehouse on Hennepin Avenue near the Mississippi river. Paper, acquired from various manufacturers, arrives in huge rolls of different widths. Highly automated machines cut the stock to the tight tolerances required by computer printers, make perforations, sprocket holes, and, as required, print custom or standard (such as green bars) information on the forms.

What was most impressive was some of the more innovative things they are doing. For example, they have an experimental 9 1/2 x 11 stock with half inch tear-off on each side. What is special is that the tear off perforations have been improved such that, after tear-off, the edges are more like good quality bond, than the typical hairy tab-stock. Thus, the perforated stock may be used for correspondance where you might have hesitated in the past.

For the very finicky consumer, they make a sprocket fed carrier with a glue on it, to which are stuck high quality bond paper, on which you may optionally have a letter head printed. The bond peels off very easily without hardly a trace of the glue on the backside.

Some very complex multi-part forms with partial-carbons or NCR paper were seen. Card stock such as for membership cards with special perforations is easy for Custom Business Forms. What surprised me is that many of the runs were short (1000 copies). If you have some special application, consider having a custom form cut and or printed.

# Ask for SYNCOM diskettes, with burnished Ectype® coating and dust-absorbing jacket liners.

As your floppy drive writes or reads, a Syncom diskette is working four ways to keep loose particles and dust from causing soft errors, dropouts.

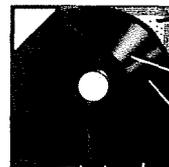

Cleaning agents on the burnished surface of the Ectype® coating actually remove build-up from the head, while lubricating it at the same time.

A carbon additive drains away static electricity before it can attract dust or lint.

Strong binders hold the signal-carrying oxides tightly within the coating.

And the non-woven jacket liner,

more than just wiping the surface, provides thousands of tiny pockets to keep what it collects.

- Liner collects and "pockets" loose particles
- Tightly bonded milled ferrous oxides
- Head-cleaning and anti-static agents

To see which Syncom diskette will replace the ones you're using now, send for our free "Flexi-Finder" selection guide and the name of the supplier nearest you.

Syncom, Box 130, Mitchell, SD 57301. 800-843-9862; 605-996-8200.

Manufacturer of a full line of flexible media

A Division of Schwann's Sales Enterprises, Inc

functions are now available during Edit mode. This was not possible on the earlier PLE." This seems to promise more than is delivered. Cursor movements (ESC I,J,K,M) do not work in the Edit mode; ESC -> does. Escape functions can also be nested to eight levels.

As mentioned, the disk includes DOS MOVER. It also includes three programs called FIX FID, FIX MUFFIN, and FIX RENUMBER to modify these programs to run with DOS on the Language Card. A configuration program lets you select your 80-column card and enable the typeahead buffer.

Unfortunately, the excellence of the program is not matched by the manual. For example, the first step is "Just insert the included disk in your drive and boot it normally." Well, what's normal for an Integer Apple with Language Card? With SUPER TEXT 40/80, which needs Applesoft, I boot the 3.3 Master and do a PR#6 to boot the program. When I did this with GPLE, I was suddenly Applesoftless; it had disappeared from the Language Card.

The Integer and Applesoft PLE programs have been replaced with three binary files: PLE.48, PLE.LC, and PLC.DM. The manual does not explain what these are. Being "skilled" in the art, I deduced that these must be 48K, Language Card, and DOS MOVER versions.

(Dr. John Hansen Watson -- Ed)  
The boot programs, one Applesoft and one Integer, both BRUN PLE.48. Does this automatically load the Language Card? I wasn't sure so I booted the 3.3 Master again, did a BRUN PLE.LC, and finally had both GPLE and Applesoft.

The three binary PLE files are unlocked so that they can be modified with the Configuration program. It appears that each PLE program can be configured as desired. Unless PLE.48 contains a procedure to search for the Language Card, I don't understand how the Language Card can be loaded automatically. No information is given as to whether the boot programs should be changed to BRUN PLE.LC with the Language Card or BRUN PLE.DM with DOS MOVER.

The Edit Commands are clearly defined. However, in an example to demonstrate how to use them to edit a program line, three incorrect uses of the CTRL-F (Find) function are shown. The character to be found is shown only once instead of the two or three times needed to achieve the desired result. The letter

"O" and number "0" are confused in the text twice. ESC O will give CALL -936; ESC 0 will not. Many Escape functions are not documented.

The FIX FID, FIX MUFFIN, and FIX RENUMBER programs are text files and, unless instructions for their use are included in DOS MOVER, none are given. I rediscovered that DOS MOVER still does not load into my Apple, but gives the "Language Not Available" message that it did when I typed it in from CALL-A.P.P.L.E.

My criticisms of the manual should not be allowed to distract from the quality of GPLE. It is an excellent utility that is a must for anyone working with BASIC programs. I intend to buy it as soon as I can.

There are two versions. That from Synergistic Software is \$64.95 and available in disk or ROM versions. The original PLE disk, manual, and \$35.00 can be exchanged for the new version only through Synergistic. The A.P.P.L.E. version will be available to members only for \$38.50 sometime in June.

My thanks to Tom Jefferson of Computer Professionals who let me borrow his Synergistic original for this review.

# SHOW UP FOR THE SHOW

MINNEAPOLIS AUDITORIUM  
AND CONVENTION HALL  
MINNESOTA

SEPTEMBER 16-19, 1982

THURSDAY: 11 AM TO 7 PM  
FRIDAY: 11 AM TO 9 PM  
SATURDAY: 11 AM TO 9 PM  
SUNDAY: 12 NOON TO 6 PM

## SEE US AT THE SHOW

The world's largest presentation of Apple-compatible products including hundreds of exhibits featuring plug-in cards, computers, components, peripherals, publications, gifts, magazines, services, accessories and software for home, office and school . . . plus seminars, workshops, hands-on centers, software spotlights and special multi-media presentations.

For Apple Users, Applefest is absolutely the most spectacular extravaganza ever . . . It is an international conference, convention and exposition featuring 7,000 different Apple accessories (at discounts of 10% and more) and dozens of workshops and seminars to make your Apple more exciting, more useful and more powerful . . . than you ever imagined.

Planning to purchase a computer? Factory experts will be on hand to instruct

you and your family. You'll see why Apple, with its thousands of accessories and software packages, is the most versatile computer for business and personal use.

Admission is \$6 per day for adults and \$3 for children. Multiple-day discount tickets are available at the door. There is no additional charge to attend the seminars, workshops and hands-on centers.

# PEEKs, POKES & CALLS

NOTE: THIS MATERIAL STILL UNDER DEVELOPMENT. "?" INDICATES UNCERTAINTY.

This article was downloaded from 'PMS - PALO ALTO'.

## SCROLLING WINDOW

POKE 32,L SETS LEFT SIDE OF SCROLLING WINDOW (L=0 TO 39)  
 POKE 33,W SETS WIDTH OF SCROLLING WINDOW (W=1 TO 40-L)  
 POKE 34,T SET TOP OF SCROLLING WINDOW (T=0 TO 23)  
 POKE 35,B SETS BOTTOM OF SCROLLING WINDOW (B=0 TO 23;B>T)

## CURSOR POSITION

POKE 36,CH SETS HORIZONTAL CURSOR POSITION (CH=0 TO 39)  
 POKE 37,CV SETS VERTICAL CURSOR POSITION (CV=0 TO 23)

## CHARACTER DISPLAY

POKE 50,255 WHITE ON BLACK  
 POKE 50,63 BLACK ON WHITE (INVERSE)  
 POKE 50, BLINKING

## SCREEN FORMAT GRAPHICS

POKE -16304,0 SET COLOR GRAPHICS  
 POKE -16303,0 SET TEXT MODE  
 POKE -16302,0 CLEAR MIXED GRAPHICS  
 POKE -16301,0 SET MIXED GRAPHICS  
 POKE -16300,0 CLEAR DISPLAY PAGE 2 (BASIC COMMANDS USE PAGE 1 ONLY)  
 POKE -16299,0 SET DISPLAY TO PAGE 2  
 POKE -16298,0 CLEAR HIRES GRAPHICS  
 POKE -16297,0 SET HIRES GRAPHIC MODE  
 CALL -1994 Clears upper 20 lines of PAGE 1 to REVERSED @ Signs. If in LOW-RES Graphics MODE, this clears the upper 40 lines of Graphics Screen to Black (PAGE 1 only).  
 CALL -1998 CLEARS ENTIRE TEXT PAGE 1 TO REVERSED @ SIGNS. IF IN PAGE 1 LOW-RES OR, THIS CLEARS THE ENTIRE SCREEN TO BLACK.  
 CALL -12274 CLEARS CURRENT HI-RES SCREEN TO BLACK  
 CALL -12270 CLEARS CURRENT HI-RES SCREEN TO HCOLOR MOST RECENTLY PLOTTED.

## TEXT

CALL -936 HOME CURSOR AND CLEAR SCREEN (ESC-@)  
 CALL -958 CLEAR FROM CURSOR TO END OF PAGE (ESC-F)  
 CALL -868 CLEAR FROM CURSOR TO END OF LINE (ESC-E)  
 CALL -922 LINE FEED (CTRL-J)  
 CALL -912 SCROLL UP ONE LINE.

## KEYBOARD

X=PEEK (-16384) READ KEYBOARD; IF X<127 THEN KEY WAS PRESSED. ALWAYS CLEAR KEYBOARD STROBE AFTER READING KEYBOARD.  
 POKE -16368,0 CLEARS KEYBOARD STROBE.

## SOUND

X=PEEK (-16336) TOGGLES SPEAKER (1 CLICK).  
 POKE -16336,0

## CASSETTE

X=PEEK (-16352) TOGGLES CASSETTE OUTPUT ONCE (1 CLICK ON CASSETTE RECORDING).

## GAME PADDLES

X=PEEK (-16287) READ PDL (0) PUSH BUTTON SWITCH. IF X>127, THEN SWITCH IS "ON".  
 X=PEEK (-16286) READ PDL (1) PUSH BUTTON SWITCH. IF X>127, THEN SWITCH IS "ON".  
 X=PEEK (-16285) READ PDL (2) PUSH BUTTON SWITCH. IF X>127, THEN SWITCH IS "ON".  
 POKE -16296,1 CLEAR GAME I/O AN0 OUTPUT (OFF-3.5V HIGH).  
 POKE -16295,0 SET GAME I/O AN0 OUTPUT (ON-.3V LOW).  
 POKE -16294,1 CLEAR GAME I/O AN1 OUTPUT (OFF-3.5V HIGH).  
 POKE -16293,0 SET GAME I/O AN1 OUTPUT (ON-.3V LOW).  
 POKE -16292,1 CLEAR GAME I/O AN2 OUTPUT (OFF-3.5V HIGH).  
 POKE -16291,0 SET GAME I/O AN2 OUTPUT (ON-.3V LOW).  
 POKE -16290,1 CLEAR GAME I/O AN3 OUTPUT (OFF-3.5V HIGH).  
 POKE -16289,0 SET GAME I/O AN3 OUTPUT (ON-.3V LOW).  
 CALL -1250 MONITOR S/R TO READ PADDLE - X-REG CONTAINS PADDLE # (0 TO 3)

## LO-RES COLORS

0=BLACK	1=MAGENTA	2=DARK BLUE
3=LIGHT PURPLE	4=DARK GREEN	5=GRAY
6=MEDIUM BLUE	7=LIGHT BLUE	8=BROWN
9=ORANGE	10=GRAY	11=PINK

## THANK YOU

by John Schoeppner

Thanks to Elmer Mattila for his talk on structured programming at last months Pascal SIG meeting.

## MINUTES

### BOARD MEETING

May 12th, 1982

Meeting, at Ron Androff's residence, was called to order by the president at 7:30pm.

#### OLD BUSINESS:

- Minutes were approved as printed.
- There was no financial report. John Hansen will get books from Marilyn Thomas and report at next meeting.
- Board member candidates were approved as printed with the following changes. Terry Schoeppner is the new Software coordinator. Ken Voss is the new Nibble coordinator. A new position of Advertising coordinator was created. Eric Holterman will fill this position.
- There was some discussion about the purchase of the Utility disk for DB Master. We will wait until rev. is firm.

#### NEW BUSINESS:

- After much discussion it was moved by John Hansen and seconded by Dave Laden:

MINI'APP'LES DOES NOT PERMIT PUBLIC DISPLAY, SALES, OR DISTRIBUTION OF PRODUCTS OR SOFTWARE BY OUTSIDE VENDORS, UNLESS SUCH ACTIVITY IS PART OF THE PROGRAM FOR THAT MEETING.

- Motion passed
- Meeting places and dates were discussed. The second Wed should be reserved for board meetings. Special interest and branches may set their meeting dates for their own convenience. We are looking for a permanent home - Chuck Boody will investigate.
- Chase Allen proposed a new format for the general meeting: one half of the meeting will be for the program the other half will be for small group sessions such as

Beginners  
 Apple tech facts  
 Pascal  
 Basic  
 CP/M  
 Visicalc  
 Communication  
 Etc.

Meeting was adjourned at 11 PM

Respectfully submitted

Hugh Kurtzman, secretary.

## ANNOUNCEMENTS

### PROGRAMMING SEMINAR

LEARN HOW, WITH JUST A FEW HOURS OF INTENSE INSTRUCTION AND HANDS ON PRACTICE, TO:

1. Format inputs using FOR-NEXT, ON GOSUB, and ON GOTO routines.
2. Utilize the GET statement for INPUT and error trapping.
3. Create your own ~~BYTEREAD~~ output editing and correction routines.

### BUSINESS SIG

The Business SIG met on June 10th. at Dayton's Warehouse to review Data Base Management systems. Art Miller lead a tutorial of DBMaster and the ensuing discussion compared this software to others. I would like to welcome the 20 people who attended.

We are planning to develop a directory of BUSINESS SIG members' with information on hardware/software and expertise. If there are any of you out there who wish to be included, knock once for 'Yes'...!! Alternately, please attend the next meeting, or contact me by phone.

The next meeting will be held on July 8th. at Dayton's Warehouse at 701 Industrial Blvd., N. Minneapolis. Earl Anderson will review GENERAL LEDGER systems. The meeting will start at 7 PM.

In order to develop the Business SIG into a strong group, I would like to encourage all members to promote the existence of the SIG to Apple users' in corporations and business. Please also encourage your favorite computer store to publicise our group. It is our plan to meet monthly, on the second Thursday but watch Mini'app'les calender for details.

## CLASSIFIED
