UPDATES and REGISTRATION

As improvements are made and new features added to Fontrix, Data Transforms offers periodic updates to registered Fontrix users for a nominal fee.   The charge for these updates is usually $10 unless otherwise posted. Updates may be had directly from Data Transforms   or from participating dealers.   Details and instructions will be automatically mailed to you at the time of the updates.
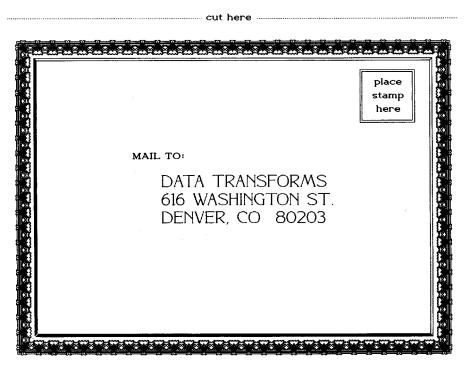

In order to qualify for these updates you *must* fill out and return the registration form at the bottom of this card. Registration also entitles you to recieve our intermittently published newsletter, Fax4u, which offers helpful hints and methodologies for using the program.

Comments:

YOICKS...THE FONT HUNT !

Fontrix companion volumes, called *Fontpaks*, which contain new character sets, will be published on a periodic basis. Many of these fonts are developed by independent Fontrix users like yourself. We invite you to submit your original font designs to us for consideration. If published, you will recieve $100.00 for each font selected. Your name will appear on the Fontpak documentation as author of the font(s), and you'll recieve free the volume(s) in which they are published. (Published fonts become the property of Data Transforms, Inc.)

Send your submissions in print-out form only, to the attention of: FONT HUNT. Please include information on the cell size of the font, and the magnification factor used.
